Baaritaanka Caadiga ah Inta aad Uurka Leedahay

Halkan waxaan ku muujineynaa oo aan ku sharxeynaa sheybaaryada faraha badan ee laga yaabo in aad sameyso inta aad uurka leedahey ama markaa aad dhaleyso. Waa in aad kala hadashaa kalkaalisada, umulisada, ama shaqaalaha kale haddii aad wax ka qabto baaritaanada ama natijadooda.

Sheybaadhka	Waxa la baadhayo	Macluumaadka	Faallooyinka
Nooca dhiiga/baadhid	<i>Dhiiga</i>	Arrimaha lagama maarmaanka ah. Waxey fa'iido u tahey dadka u baahan irbada Rhogam marka ay dhalaan.	Dhiig ayaa lagu shubikaraa haddii loo baahdo. Haddii hooyadu tahey RH negetive, ilmuhuna RH positive, hooyadu waxey u baahantahey irbada Rhogum marka ay dhasho.
Kooxda B strep (Beta strep)	<i>Dheeca- ankaa waxa la eegaa qofgu marka uu leeyahay</i>	Waxa laga yaaba cudurka in ay qaadsiiso ilmaha	Haddii baktiiriya laga helo siilka ama kaadida, ama ay hooyada qabto xaalado khatar gelinaya (PTL, ROM, etc.), waxaa lagu daweynayaa antibiyootiko. Haddii cudur lagaa helo, ilmaha waa in la eegaa hal illaa labada cisho ee hore.

Su'aalo?

Su'aalahaagu waa muhiim. Waxaad wacdaa dhakhtarkaaga caafimaadka haddii aad su'aalo iyo walwal qabtid. Shaqaalaha bukaan socod eegtada UWMC ayaad waqti kasta helaysaa si ay kuu caawiyaan.

Common Tests During Labor

This chart lists and briefly explains many of the tests you may have during your labor and birth. Be sure to talk to your doctor, nurse, midwife, or other clinic staff if you have questions or concerns about the tests or your test results.

Test	What's Tested	Information	Comments
Blood type/screen	<i>Blood</i>	Useful information in an emergency. Helps identify women who need Rhogam shot after the birth.	Transfusion only if needed. If mother is Rh negative and baby is Rh positive, the mother needs a Rhogam shot after the birth.
Group B strep (Beta strep)	<i>Results checked of cultures taken during pregnancy</i>	May pass infection to the baby at birth.	If bacteria is present in vagina or urine, or the mother has risk factors (PTL, ROM, etc.), she will be treated with antibiotics. If the mother has tested positive, baby may need to be observed after birth for the first day or two.

Questions?

Your questions are important. Call your doctor or health care provider if you have questions or concerns. UWMC clinic staff are also available to help at any time.
