Pavilion Surgery Center

Gangliolysis

*What to expect after your operation –
Dr. John Loeser*

Symptoms to report to the doctor:

- **Fever greater than 100°F**
- **Pain not controlled by pain medication**
- **Stiff neck**
- **Any other concerns**

Activity

- As tolerated. Be careful when chewing – inside of mouth may be numb.
- May resume all regular activities when awake and alert after anesthetic.

Dressing

- Take Band-Aid off in six to eight hours.
- May wash face and brush teeth.

Medications

- Tic medications – decrease each medicine by one pill a day until you are off the medicine.
- Post-operative pain – use medications given to you as told.
