Stapedotomy
What to expect and how to prepare

Stapedotomy is surgery to rebuild the parts of the middle ear that conduct sound. In this surgery, the stapes (stirrup bone) is bypassed and replaced by a prosthesis (a man-made part).

This handout explains how to prepare for your operation and how to plan for your recovery.

How to Prepare

- **Do not** take any aspirin or aspirin-like products for 2 weeks before your operation, unless told to do so by your doctor. (See attached sheet.)

- Do not shave any part of your body that you do not already shave every day. If you normally shave near your surgical site, do **not** shave that area for 2 days (48 hours) before your surgery.

- This is an outpatient surgery. You will go home the morning of your operation. You must arrange for a ride home. You may not drive yourself.

**24 Hours Before Your Surgery**

- **Take 2 showers:** Take 1 shower the night before, and a second shower the morning of your operation. Use the antibacterial soap your nurse gave you to wash your body.

  Do **not** use the antibacterial soap on your face and hair. (See directions that came with the soap.) Use your own soap and shampoo on your face and hair. Use clean towels to dry off, and put on clean clothing.

- **Arrival time:** The pre-surgery nurse will call you by 5 p.m. the night before your operation. If you are having surgery on a Monday, the nurse will call you the Friday before. If you do not hear from the pre-surgery nurse by 5 p.m., please call 206-598-6334.

  The pre-surgery nurse will tell you when to come to the hospital and will remind you:
  - Not to eat or drink after a certain time
  - To arrange for someone to drive you home after surgery
  - Which of your regular medicines to take or not take
  - To sip only enough water to swallow your pills

UW Medicine
UNIVERSITY OF WASHINGTON MEDICAL CENTER
What to Expect After Your Operation

**Precautions**
Because you will have received general anesthesia, do **not** do these things for 24 hours after surgery:
- Drive or travel alone
- Use machinery
- Drink alcohol
- Sign any legal papers
- Be responsible for the care of another person

**Ear Dressing**
You will have packing in your ear after surgery.
If your ear bleeds, call the clinic. **Do NOT take out any of the packing from your ear.** The packing will be removed by your doctor at your next clinic visit.

**Pain Medicine**
You will be given oral antibiotics and medicine for pain. Take these medicines as prescribed. You should have very little discomfort.

**Eating**
You can usually begin to eat and drink the evening of your procedure. You may feel a little queasy from the anesthesia.

**Nose-blowing and Sneezing**
Do **not** blow your nose for 3 weeks. If you need to get mucus out of your nose, sniff it back and then spit it out. If you sneeze, do it with your mouth open. Do not hold your nose when you sneeze, since this will increase the pressure your ear.

**Hearing**
Your hearing may come and go during the first 4 weeks after surgery. You may hear cracking or popping in your ear, and it may sound like your head is in a barrel. All of these things are normal.

**Return to Work**
Most people can return to work 1 week after surgery. How much time you take off may depend on what you do for a living. Your doctor will tell you if you need to take more time.
Follow-up Visit

Your follow-up visit will be 7 to 10 days after surgery, on:

__________________________________________________________

Travel and Activity

You may need to limit travel and other activities after your stapedotomy. Ask your provider what guidelines you should follow.

Call the Clinic Nurse or Doctor On Call If You Have:

- Bleeding from your ear
- Fever higher than 101.5°F (38.6°C)
- Signs of ear infection:
  - Increased redness
  - Swelling
  - Pain
  - Drainage
- Ongoing dizziness
- Nausea or vomiting
- Concerns that cannot wait until your follow-up visit
