Start Date: _____ End Date: _____

Temodar Schedule

Starting taking temodar on the night before your first radiation dose.

Take a total of _____ mg temodar at bedtime every night for:

- 3 weeks (21 days in a row)
- 6 weeks (42 days in a row)

This is the number of capsules you will need to take for each dose:

Capsule Size	Number of Capsules
250 mg	
180 mg	
140 mg	

Capsule Size	Number of Capsules
100 mg	
20 mg	
5 mg	

Zofran

Take **8 mg Zofran**:

- 30 to 60 minutes before taking Temodar.
- Every 6 to 8 hours, as needed for nausea and vomiting.

Blood Tests

Before you start your treatment, you will have these blood tests:

- CBC with differential and complete metabolic panel
- Pregnancy (if needed)
- Infections (if needed)

You will have these tests every week during your treatment:

- Complete blood count (CBC) with differential and Complete Metabolic Panel (CMP)

For Your Safety

Do not have any dental cleaning below the gum line during your treatment. Most patients can have dental cleaning once their treatment ends, as long as their labs are within normal limits.
