

Donor Egg Checklist

Tasks to do before your treatment cycle

This handout is for women who plan to become pregnant using frozen eggs. It lists tasks that must be done before undergoing a treatment cycle.

University Reproductive Care (URC) follows Food and Drug Administration requirements and American Society for Reproductive Medicine guidelines for use of donor eggs.

Talk with your URC provider if you have any questions.

Checklist

Your URC provider will go over this checklist with you during your donor egg counseling session. Please ask any questions you have.

Task	Details
<input type="checkbox"/> Infectious disease screening for you and your partner (if partnered)	Results are valid for 12 months.
<input type="checkbox"/> Genetic carrier testing is optional but advised	Lets you know if your partner or sperm donor is a carrier for the same disease(s) as a prospective egg donor.
<input type="checkbox"/> Visit with fertility counselor	URC provides a qualified social worker.
<input type="checkbox"/> Choose egg bank and donor <input type="checkbox"/> Complete egg bank paperwork	When donor selected, egg bank will contact URC to confirm match.
<input type="checkbox"/> Complete URC Embryology Lab consent for receipt of donor eggs	Must be signed by patient and partner (if partnered) and witnessed or notarized.
<input type="checkbox"/> Order eggs and arrange shipment to URC Embryology Lab (see address at left)	Patient speaks with egg bank to request shipping. Egg bank contacts URC Embryology Lab to finalize shipping date.

Questions?

Your questions are important. Call your doctor or healthcare provider if you have questions or concerns.
