

Instructions After Bravo Ph Capsule Study

The chance of complications (problems) related to this procedure is very low. However, it is important to know what to watch for and how to get help if needed.

Instructions:

- You can start eating your normal diet when swallowing feels comfortable.
- A mild sore throat is normal for a few hours. Throat lozenges may help.
- Follow all the instructions from your care team.
- Do not plan any MRI scans for 30 days after bravo capsule placement.

Scan for a digital copy of this handout.

Warning Signs

Call us if you have:

- A temperature of 100.5° or higher
- Unusual chest or abdominal (stomach) pain
- Trouble swallowing or moving your neck
- Vomiting blood
- Blood in your stool

Call your clinic if you have any questions about your procedure.
