

Non-Identified Donor Sperm Checklist

Tasks to do before insemination

This handout is for patients who plan to become pregnant with sperm from a non-identified donor. It lists the tasks that must be done before insemination. This list meets Food and Drug Administration (FDA) requirements and American Society for Reproductive Medicine (ASRM) guidelines for use of donor sperm.

Scan for a digital copy of this handout.

Task	Details
<input type="checkbox"/> Choose sperm bank	See handout "Donor Sperm Banks."
<input type="checkbox"/> Complete sperm bank paperwork, if required	CRHF fax number: 206.598.7080
<input type="checkbox"/> Decide what type and quantity you need	<i>Type:</i> IUI, ICI, or ART/IVF <i>Quantity:</i> Individualized to treatment type and your family-building goals.
<input type="checkbox"/> Infectious disease screening for you and your partner (if you are partnered)	Test results are valid for 12 months.
<input type="checkbox"/> Genetic carrier screening is optional, but advised	Screening will tell you if you are a carrier for the same disease(s) as a prospective donor.
<input type="checkbox"/> Visit with fertility counselor	CRHF provides a qualified social worker.
<input type="checkbox"/> Order your sperm	If you are CMV negative, buy only CMV negative sperm. If you are CMV positive, buy either CMV positive or negative sperm.
